

# maxisafe® Glove Clips

Unique engineered Safety Break device area

This Safety Break device area is engineered to separate only if pressure exceeds 5kg pressure. For example: if unit is trapped or caught in machinery.

Strong tension jaws hold belt or loop or fix directly to clothing

Tension release grip

Double swivel post with unique Safety Break device

Tension release grip

Larger firm-tension jaws hold gloves or other articles ready for use

## Features & Benefits

- The Maxisafe Glove Clips interlocking teeth securely grip your gloves, earmuffs, helmet, towel, clothes or anything else you attach to them
- Proven to reduce glove replacement costs and hand injuries because workers have their gloves with them when needed
- To use, attach the small end around your belt loop or directly to your clothing and attach the large end to your gloves
- Made from specialised material that holds its memory and does not fatigue from use
- Designed to separate and break if the item being held is caught in machinery
- Holds up to 5kgs
- Available in Fluro Yellow and Fluro Orange
- Made in Australia
- Bag of 20 clips

## Applications

- Any application where gloves are used
- Automotive industry
- Building and construction
- Logistics and warehousing
- Mining
