

Maxiguard Multigas & Particulate Filter

R703-ABEK1P3

Suitable for use with:

- R7500 MaxiGuard Silicone Half Mask (P2 only)

- R680 & R690 MaxiGuard Silicone Full Face Mask

Product Features & Benefits

- **Secure Locking Mechanism:** A reliable bayonet connector ensures a secure locking mechanism. This guarantees a tight and dependable seal, preventing any unwanted leakage or infiltration, and allowing users to work confidently in various environments.
- **Streamlined Design:** Enhancing convenience and usability, R703-ABEK1P3 incorporates a particulate filter that is permanently attached to the cartridge. Eliminating the hassle of separate components.
- **Feather Light Comfort:** Incredibly lightweight, R703 ABEK1P3 prioritises comfort without compromising on safety. The lightweight design minimises strain and fatigue during extended use, allowing users to focus on their tasks with maximum comfort and freedom of movement.
- **Low Breathing Resistance:** Engineered to minimise breathing resistance, allowing for effortless and unrestricted airflow. This feature enhances user comfort and promotes a natural breathing experience, making it easier to perform tasks without feeling restricted or strained.
- **Comprehensive Protection:** R703 ABEK1P3 offers broad coverage by providing multi gas and particle protection. With this versatile filter, you can confidently tackle a wide range of hazards, ensuring your safety and well being in various environments.
- Certified to AS/NZS 1716:2012

Applications

Common Hazards: For protection when working with a variety of chemicals such as Organic vapours with B.P. >65 65°C, chlorine, hydrogen sulphide, hydrogen cyanide, sulphur dioxide, acid gases, ammonia, methylamine, and particles reusable.
